The Art of Huapitality

Welcome the coming guest welcome him with a few sample, pleasant, casy words, with our octentsimos cordulity without gushing deciaration of frind-ship, without parshaging his arm by an interminable ebaking of hands, with instrunk tarried up to his room, or sandwitching between every sentence an anxious appeal to make himself entirely at home—an appeal which usually operates to make one feel as much away from home as possible. Constantly taking it for granted on the part of the host and his lamily that one la not comfortable and that they must burry about and take all responsibility (and all bell inheres) from the guest, thus depicting him of the credit of common sense, is something worthy of mingration as lithe incore so because point mess torbids the last sign of impliance. And set how many of our well invanions, and in most things, well breeze profess. bicquist politicism forbids the least sign of impitience. And yet how many of our will meaning, and in most things, well bred people, fall into the error that unless they are consistantly on the abrit, unless they estat lish a kind of sepi onage over their guest, and watch his every movement, but he should brush his count or take a seat for himself, they still be wanting in courtery. The art of hospitality constate in putting him to be at this case, and this does not mean telling him to be at this case. It consists in making him lorget that he is a guest will not in constantly pushing the first before his tyes. And it also consists in leaving to 1 im the exercises of his senses and of responsibility, at least so fir that, finding what he needs at his hand, he may help himself. The Cultivator

In France, on the contary, good grooms, unless instact to the coarry, are unknown white each unin, woman at child has a tree for cooking.
